

Trust Settings by Business Function

A one-page reference for what trust setting AI should be on, by department and task type. Print it. Tape it next to your monitor.

From HitLai Institute — Module S4: “AI You Can Actually Trust”

HOW TO USE THIS SHEET

For every flow you’re considering, find the closest row. The recommended setting is your **starting point**, not a permanent assignment. AI graduates up only on the flows where it’s been right at least 20 times in a row, with your team’s approval each time. AI never graduates beyond “you approve” on legally binding or regulated work.

The four settings are: - **AI watches** — AI shows insights; your team does the work - **AI suggests** — AI recommends; your team decides - **AI acts, you approve** — AI drafts and pre-fills the send; your team taps approve - **AI handles routine, you handle exceptions** — AI runs the pattern; your team owns the edge cases

SALES

Task	Starting setting	When to graduate	Never graduate beyond
Prospect research	AI handles routine	Day 1 — low risk	(no ceiling)
Outbound message draft	AI acts, you approve	After 50 sends with no edits needed	AI handles routine — for templates only, never personalized
Proposal draft (existing customer, locked pricing)	AI acts, you approve	After 30 right-every-time	AI handles routine
Proposal draft (new prospect, custom scope)	AI suggests, you write	(stays here permanently)	AI suggests — custom scope needs you
Pricing changes / discounts	AI watches	(never — you decide pricing)	AI watches
Contract sent for signature	Human only	(never — legally binding)	Human only

CUSTOMER SUPPORT

Task	Starting setting	When to graduate	Never graduate beyond
FAQ response (hours, location, policies)	AI acts, you approve	After 20 right answers from approved library	AI handles routine
Order status inquiry	AI acts, you approve	After 30 right answers	AI handles routine
Refund request	AI suggests, you write	(emotional nuance — stays here)	AI suggests
Complaint / escalation	AI watches	(never — humans handle complaints)	AI watches
Anything mentioning legal, injury, data breach	Human only	(never)	Human only
Cross-channel conversation continuity	AI acts, you approve	After 30 correct routings	AI handles routine

FINANCE & ACCOUNTING

Task	Starting setting	When to graduate	Never graduate beyond
Invoice data extraction	AI acts, you approve	After 50 right extractions	AI handles routine — for known vendors only
Expense receipt categorization	AI acts, you approve	After 50 right categories	AI handles routine — under your \$X threshold
Vendor payment	AI suggests, you write	(you sign off on every payment)	AI suggests
Bank reconciliation	AI suggests, you write	After 30 clean reconciliations	AI acts, you approve
Tax filing	Human only	(never)	Human only
Customer credit check	AI suggests, you write	After 30 correct flags	AI suggests

MARKETING

Task	Starting setting	When to graduate	Never graduate beyond
Social media draft	AI acts, you approve	After 30 on-brand drafts	AI handles routine — for evergreen posts only
Newsletter draft	AI acts, you approve	After 20 sends with light edits	AI acts, you approve (always read)
Blog post draft	AI suggests, you write	(your voice matters)	AI suggests
Ad copy variants	AI handles routine	Day 1 — A/B test layer catches errors	(no ceiling)
Public claim with numbers	Human only	(never — legal liability)	Human only
Press release	AI suggests, you write	(stays here)	AI suggests

OPERATIONS

Task	Starting setting	When to graduate	Never graduate beyond
Weekly status report	AI acts, you approve	After 4 weeks of right numbers	AI handles routine
Inventory reorder alerts	AI acts, you approve	After 10 correct reorders	AI handles routine — under \$X threshold
Vendor communication (routine)	AI acts, you approve	After 20 sends	AI handles routine
Vendor escalation / pricing dispute	AI suggests, you write	(stays here)	AI suggests
Scheduling / meeting setup	AI handles routine	Day 1 — recoverable in seconds	(no ceiling)
Hiring / firing communication	Human only	(never)	Human only

HR & PEOPLE

Task	Starting setting	When to graduate	Never graduate beyond
Job description draft	AI acts, you approve	After 10 on-brand drafts	AI acts, you approve
Candidate screening (initial)	AI suggests, you write	(bias risk — humans decide)	AI suggests
Interview scheduling	AI handles routine	Day 1	(no ceiling)
Performance review draft	Human only	(never — feedback is human work)	Human only
Compensation discussions	Human only	(never)	Human only
Compliance / harassment matters	Human only	(never)	Human only
Onboarding doc collection	AI acts, you approve	After 10 successful onboardings	AI handles routine

LEGAL

Task	Starting setting	When to graduate	Never graduate beyond
Contract intake / extraction of key terms	AI suggests, you write	(always read)	AI suggests, you write
Calendar entries from contracts (renewal, expiry)	AI acts, you approve	After 20 correct dates	AI handles routine
Drafting boilerplate clauses	AI suggests, you write	(always lawyer review)	AI suggests
Sending or signing a legal document	Human only	(never)	Human only
Regulatory filings	Human only	(never)	Human only
Conflict checks	AI suggests, you write	(firm-policy decision)	AI suggests

QUICK RULES TO MEMORIZE

1. If your team can recover the mistake in under 1 hour → AI can graduate to “handles routine” once it’s earned it.
2. If the mistake costs money or relationships → “AI acts, you approve” is the highest setting, period.
3. If the mistake is legally binding, regulated, or covered by professional duty → human only, always.
4. AI graduates by data, not vibes. 20 right in a row, minimum, before any graduation.
5. AI graduates one notch at a time. Never skip a step.
6. You can demote AI any time, instantly, no reason needed. Demotion is normal — it’s how the system stays calibrated.

THE WEEKLY 5-MINUTE REVIEW

Pick a recurring 5-minute slot. Look at:

1. What flows did AI run unsupervised this week?
2. Was anything off? (Errors, customer complaints, things your team caught and corrected)
3. Anything that should be demoted a notch?
4. Anything that's been right 20+ times — eligible to graduate next week?

That's the entire trust-maintenance practice. Five minutes. Once a week. Permanently.

THE HITLAI ANSWER, IN ONE LINE

AI tools, your team, your systems — running together, safely.

These settings live inside HitLai — per flow, per question type, per dollar threshold. Every action your team approves (or AI takes on its own at “handles routine”) is logged where you can see it in 60 seconds. Each part of your business moves at its own pace. Works with the AI you already use, and the systems your team works in.

Want to walk through these settings for your specific flows? That's Module S4 — bring your top 5 flows and we'll set them with you. → hitlai.net/institute
